

SATPRO_Device

DEVICE

The Device window provides information about certain properties of the SATPRO and allows the user to change the product NAME as needed.

Properties:

- **Producto:** SATPRO (Fixed)
- **Serial:** A01 (Serial Number)
- **Name:** IMASD or customized name (can be changed)
- **IP8 or DEV:** 25 (Device number on RCBus network, SATPRO is always 25)
- **VBAT:** 16.38V (Battery voltage; can be adjusted if calibration is off)
- **VCC:** 5.0V (PCB voltage; can be adjusted if calibration is off)
- **VCPU:** 3.3V (Microcontroller voltage; can be adjusted if calibration is off)
- **TEMP:** 31°C (Microcontroller temperature; can be adjusted if calibration is off)
- **APP:** 6.55b066 (Firmware version)
- **MAC:** 004A3703040E (Hardware MAC address of the microcontroller, generated automatically)

Changing the Name:

To change the product name, type the new name in the NAME field and press enter. You will see the name change reflected

in the main window as well.
