

SATPRO_instal_soft

Installation software XLRS_SATPRO

The installation process is very simple and doesn't require an installer. Please follow these steps:

1. install USB Driver COM port, CP210x:

- In order for the software to detect the device, you need to download and install the [Silicon Labs CP210x driver](#).

2. Download the Compressed File:

- Download the file [Xlrs_SatProV2_V170.RAR](#).

3. Create a Folder:

- Create a folder in your desired location, for example, named SATPRO.

4. Extract the Files:

- Uncompress and extract all the files into the newly created folder.

5. Run the Program:

- Click on the application XLRS_SATPRO_V170.exe to run the program.

6. Create a Shortcut:

- For easier access, you can create a shortcut on your desktop.
