Fly Beyond
To work from 100Km
Range max. 200Km

Radio Control
Data Link
Mavlink Telemetry
PC Windows 10
Maps, navigation

Video
Monitor IPS LED 10" FULL HD
Analog Receiver 5.8Ghz
Digital Input HDMI

Vehicles
DRONES, UAV, MULTIROTORS, RPAS, VANT, UAV,
AIRCRAFT, HELICOPTERS, UUV, UGV, ROV, USV, ASV,
CARS, BOATS, ROBOTS...
Embedded PC

Features

- Windows 10.
- Processor: Intel Quad Core of 1.8GHz.
- 4GB RAM and 64GB flash.
- 1 Touch screen 7”.
- 1 Keyboard.
- 1 USB 3.0.
- 1 USB 2.0.
- 1 Wifi.
- 1 Bluetooth.

Software included:

- DMDStudio, XLRS devices configurator.
- Mission Planner, Ground control station for Plane, Copter and Rover.
- Aerosim, FPV simulator (Demo).
- *You can add Others softwares.

Tilt Control of the PC Screen from Button

Mini Keyboard behind the screen

www.xlrs.eu

Manufactured by DMD. Digital Micro Devices. ©2019
**FPV Video Screen**

- Size 10.1"
- High Brightness
- Visible with sunlight
- RX 5.8Ghz
- HDMI Input for digital video RX

*OSD Shows instrumental with Mavlink and XLRS Telemetry*

**Features**

- Receiver 5.8Ghz integrated.
- Resolution: 1920 x 1080.
- Aspect ratio: 16:10
- Brightness: 600cd / m2
- Contrast: 1000:1.
- Controlled temperature.
- Speakers.
  - 1 Audio/Video input with jack connector.
  - 1 RCBus Connector to update and configure 5.8Ghz receiver.
  - 1 HDMI input to directly connect a digital video or PC of GCSD4V2.

**SPECIFICATIONS VIDEO RECEIVER**

- **Frequency**: 5.8Ghz.
- **Channels**: 8.
  - 5705Mhz, 5685Mhz, 5665Mhz, 5645Mhz, 5885Mhz, 5905Mhz, 5925Mhz, 5945Mhz.
- **Sensitivity**: -85dBm.
- **Antenna**: Internal.
- **GCSD4V2**: Ready for analog and digital video Systems.

**IPS LED video screen 10.1” Full HD, high brightness, high contrast and anti-glare, makes it an excellent screen to see on indoors and outdoors.**
Features

- RC Control independent of the PC.
- 3 Processors: RC Control and Joysticks.
- 2 Joysticks RC: professional and sensitive.
- 1 LCD screen easy-to-read, high contrast.
- 2 OLED screen Black/White for viewing data.
- 12 Configurable buttons.
- 3 Encoders with push button.
- 2 Micro Joysticks for trims and functions.
- 2 Potentiometers.
- 2 Pushbuttons.
- 4 Switches with 2 positions
- 2 Switches with 3 positions
- 1 Buzzer: Alarms, low battery, fail safe, etc.
- 1 RCBUS: Connection to Video RX XLRS, second XLRS TX and future XLRS devices.
- 1 Connector antenna: SMA Female.

Start-up Key.
Digital Voltmeter.
Fuse 5A.
12V connector for Video Screen.

2 Safety Switch with protective cover for some specific safety functions.
Battery

Features:
- Lipo 3S/11.1V/5Ah.
- Duration approx: 2.5-3h.
- Charger 1A.
- Input 12-24V.

Shows battery status from digital voltmeter or central screen.

Charger included 110 / 220V AC 50Hz

It has a 5A fuse to protect the GCS.
Suitcase

Robust

Dustproof

Water resistant

IP67 certified

Features

Temperature controlled with fans.
Certified with STANAG 4280, DEF STAN 81-41
and ATA 300 standards.
Automatic air pressure compensation valve.
Temperature resistant from -30 °C to +80 °C.

Rubber handle for easy transport.
2 eyelets for padlocks (Ø 7.62 millimeters).
Optional accessories: transport belt.
Dimensions: 36.5 x 29.4 x 17 centimeters.
Total Weight: 9Kg.
Plan, save and load autonomous missions into your autopilot with simple point-and-click way-point entry on Google or other maps.

Compatible with autopilots that use Mavlink Protocol: Pixhawk, APM, Pixhawk Cube, Pix32 and more.

Features

- Connect the autopilot telemetry to the XLRS systems.
- Setup, configure, and tune your vehicle for optimum performance.
- Download and analyze mission logs created by your autopilot.
- Monitor your vehicle's status while in operation.
- Record telemetry logs which contain much more information than on-board autopilot logs.
- View and analyze the telemetry logs.
Software - AEROSIM

Training Simulator

Learn to fly with the navigation instrumentation of the XLRS system

Integrated Plugin OSD644DMD

Realistic Drone Simulator for the beginner pilot who needs to practise many hours before flying the real thing.

Features

Training Program for the beginner.

Flight Modes: Manual, Attitude, GPS.

On-board Camera.

Stabilized Camera Gimbal.

All common Aircraft types: Trainer, Sport, Aerobatic, Glider, Delta Wing.

Power: Glow, Gas, Electric, Jet.

Functions: Flaps, Brakes, Retractable Landing Gear.

and much more...
Software - DMDStudio

Compact, you can use multiple instances.

Multiple simultaneous DMD devices.

Auto adaptable to DMD devices.

DMD Alpha command language.

Graphics and text console.

Free for DMD systems users.

Configuration software and utilities for all DMD products manufactured since 2014.

Features

For Windows 7 or higher.

Device firmware update (BOOT).

Connectivity Prepared for IOT devices. (Internet of things).

Multiple communications ports: COM, USB, UDP, TCP.

Several TCP and TCP servers depending on the device.

Connection to the DMD Cellular software.

Configuration of the specific characteristics of each device.
INTEGRATED XLRS RADIO

Manufactured with the latest technology of radio system 5th generation of DMD, that provides great radio link security for long distances.

Integrated XLRS radio with SMA-Female output for coaxial cable antenna 1 to 3m maximum length.

TECHNICAL SPECIFICATIONS XLRS RADIO

- **Range of Work**: 100Km.
- **Maximum Range**: 200Km.
- **Frequency**: CE: 869,4-869,65Mhz. FCC: 902-927,5Mhz. CUSTOM: 433Mhz, others...
- **Max RF power**: CE: +27dBm. FCC: +30dBm. CUSTOM: +30dBm.
- **Sensitivity max**: -116dBm @50kb.
- **Modulation**: 50 or 100Kb. FHSS. 2-GFSK.
- **Stability**: TXCO +1ppm.
- **Antenna Connector**: SMA-Female.
- **Encryption**: AES 128 bits.
- **Connectivity**: RC, TELEMETRY, USB, BLUETOOTH, WIFI, RCBus.
- **Upgradable & Configurable**: DMDStudio Soft.
New Concept

Configuration of the mixes, button activation and assignment of encoders are performed in the RX and not in the TX XLRS as is usual in amateur RC systems.

TECHNICAL SPECIFICATIONS

Range of Work: 100Km
Maximum Range: 200Km
Frequency:
- CE: 869.4-869.65Mhz.
- FCC: 902-927.5Mhz.
- CUSTOM: 433Mhz, others...
Multi Band:
Max RF power:
- CE: +27dBm.
- FCC: +30dBm.
- CUSTOM: +30dBm.
Sensitivity max: -116dBm @50kb.
Modulation: 50 or 100Kb. FHSS. 2-GFSK.
Stability: TXCO +-1ppm.
Encryption: AES 128 bits.
Voltage: 5V. Min 4.5V. Max 6Vcc.
Consumption:
- Standby 70mA.
- Max. TX(500mW) 540mA@12mS.
Connectivity:
- RC, Telemetry, USB, RCBus, SPPM, COM5, MODEM.
Dimension: 70.78 x 35.75 x 14.78mm.
Weight: 30g (Without ant.)
- 47g (With ant. 5dBi).

FEATURES

Control max up to 16 CH RC. Using the 7CH physical and the autopilot CH through SPPM in CH7.
8 Multifunction outputs for RC servos.
1 SPPM / CPPM: 12 RC channels in CH7.
1 Micro USB: Update and configuration.
1 i2C: To connect future devices, Oled display, sensors.
1 RCBUS: Connect XOSD for serial communication.
1 MODEM port: MAVLINK Telemetry and transparent radio modem.
1 Red Led: TX RF or Transmit packets.
1 Blue Led: Link RF or Received packets.
1 Connector antenna RC: SMA-Female.

Compatible with XLRS devices:
- TX: BT5D1, XPAD2-2017, XPAD2 V2, XPAD3, GCSD4, GCSD4V2...
- OSD: XOSD, XOSDv2, XOSD3...

Hardware Improvements:
Microcontroller with double memory FLASH, RAM and Eeprom.
Improved PCB, more protection in general.
Improved box, more robust, screws on inserts.
Internal protection against reverse polarity on +5V servo connectors.
EDS protection and RF Filters in USB.
EDS protection (static) for all pins including servos.
Pins servos protection against short circuits and overloads.

MAVLINK protocol, compatible with autopilots:
- APM, Pixhawk, PX4, etc.
- No additional radiomodem is required.

Compatible with autopilots with S-BUS?
Yes, depending on the autopilot you can connect directly to CH7 (SPPM) or you can use a PPM to S-BUS converter.

*Some product features are optional.
